Profile Summary

ICT undergraduate and early-career technology professional with hands-on experience building software solutions across full-stack development, databases, cloud technologies, and DevOps practices. Experienced in modern programming languages, frameworks, RESTful APIs, database systems, containerization, and cloud platforms through academic and industry projects.

Strong understanding of software development, system design, version control, Agile collaboration, and delivering maintainable, secure solutions. Continuously developing technical expertise while adapting to professional engineering environments and contributing to high-quality technology solutions.

Experience

Software Engineer Intern | Applantics(PVT)LTD

May 2026 - Present

- Developed 20+ application features using Laravel/PHP, delivering diverse business and software solutions, including feature-rich POS systems.
- Contributed to 7+ software projects, working across application development, business logic, database integration, and API development.
- Built 2 cross-platform mobile applications using React Native, integrating REST APIs and reusable UI components.
- Managed MySQL/SQLite databases and contributed to testing, debugging, Git-based collaboration, and deployment.

Skills

- | | | |
|--------------------------|------------------|----------------|
| • React.js, ES6, Webpack | • Laravel | • Python, Java |
| • React Native | • REST APIs | • AI & ML |
| • JavaScript, TypeScript | • AWS, MS Azure | • PHP |
| • Redux, Web Workers | • Git, Docker | • Agile, Jira |
| • Node.js, Express | • GitHub Actions | • UI/UX, Figma |
| • MySQL, MongoDB | • Linux | • HTML, SEO |
| • Tailwind CSS | • Bash | |

Education

Bachelor of Information and Communication Technology (Hons)

Jan 2022 - Present

University of Ruhuna, Matara, Sri Lanka

Linux Systems Administration & DevOps Engineering

May 2025 - Jan 2026

WSO2, Colombo, Sri Lanka

Projects

Hotel Reservation & Booking Management System | MERN

- Comprehensive booking platform handling 50+ concurrent users with real-time reservations, JWT auth, and admin dashboard featuring 12+ API endpoints.
- Scalable backend with automated notifications, file uploads, complex validations across 8+ data models, and role-based access control.
- Developed an adaptive frontend featuring instant data updates, date-picker components, datadriven forms, and push notifications via a modular component architecture.
- Tools & Technologies: Node.js, Express, MongoDB, Mongoose, React, Vite, Material UI, Tailwind CSS, Socket.io, JWT, Nodemailer, Axios, Multer, Bcryptjs.

Library Management System – Full-Stack Web Application with Advanced Database

Automation

- Delivered a scalable full-stack app using React.js, Node.js, and Express for book and member management.
- Strengthened system security by integrating JWT authentication and bcrypt password hashing.
- Maintained 95% uptime while handling 500+ concurrent users under peak load.
- Designed normalized MySQL schema with stored procedures and triggers for streamlined transactions. Optimized queries achieving sub-200ms response times, reducing API latency by 40%.
- Created 20+ RESTful endpoints with Express.js featuring authentication middleware, CORS security, and Helmet headers. Achieved A+ security rating with zero vulnerabilities in testing.

Soft Clothes – Online Clothing Store Management System

- Engineered "Soft Clothes," an online clothing store system managing 500+ product inventory.
- Processed 100+ concurrent user transactions with real-time order and payment tracking.
- Reduced manual administrative workload by 60% through automated customer registration and order management.
- Built role-based admin interface for product cataloging and managing 5+ order states.
- Implemented real-time sales reporting functionality, improving sales visibility and supporting faster business analysis.
- Tracked 8+ customer data points with batch order operations, improving efficiency by 40%.
- Tools & Technologies: PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap 4, AJAX.

Multi-User Chat Application with RMI Architecture

- Real-time chat system managing 50+ concurrent sessions with Java RMI, thread-based communication, role-based access, and persistent message logging achieving 95% delivery reliability.
- Hibernate ORM with MySQL backend for user authentication, profile management, and admin dashboard with user/chat room management and sub-second query response times.
- Java RMI server-client architecture with bidirectional channels, thread pooling, message broadcasting, automatic session management, and graceful connection handling.
- Tools & Technologies: Java 11, Hibernate 6.0, MySQL, Java RMI, Maven, Swing GUI.

Certificates

- Multicloud Network Associate Certificate issued by Aviatrix | [Verify](#)
- AWS Cloud Practitioner Essentials Certificate issued by AWS Training & Certification | [Verify](#)
- IT Essentials Certificate issued by Cisco | [Verify](#)
- GitHub Foundations Professional Certificate by GitHub | [Verify](#)
- Artificial intelligence & Machine learning Engineer (Stage 1) issued by SLIIT | [Verify](#)

Extracurricular Activities

- | | |
|---|---------------------|
| Academic Mentor - ICT Students' Circle, University of Ruhuna | May 2024 - Present |
| • Guided a group of junior students in academic projects and technical skill development. | |
| Media Team Member - ICT Students' Circle, University of Ruhuna | Feb 2024 - Feb 2025 |
